Experiment 3: Network Switching Subsystem Flowchart

Aim: To develop a flowchart illustrating the operation of a Network Switching Subsystem (NSS) in a mobile cellular system using Figma.

Procedure:

1. Open Figma and create a new design frame.
2. Add a Start symbol at the top of the flowchart.
3. Draw process boxes for receiving and processing a call request.
4. Add a decision diamond to check whether the destination is in the same network.
5. Connect the branches to connection setup or an external network, followed by call termination.
6. Add arrows, labels, and colors to complete the flowchart.

Output:

Result: A flowchart representing the major operations of the Network Switching Subsystem was created successfully.
