Experiment 11: Mobile Application Wireframe with Security Measures Using Figma

Aim: To design a mobile application wireframe incorporating security features such as login authentication, password protection, OTP verification, and privacy settings using Figma.

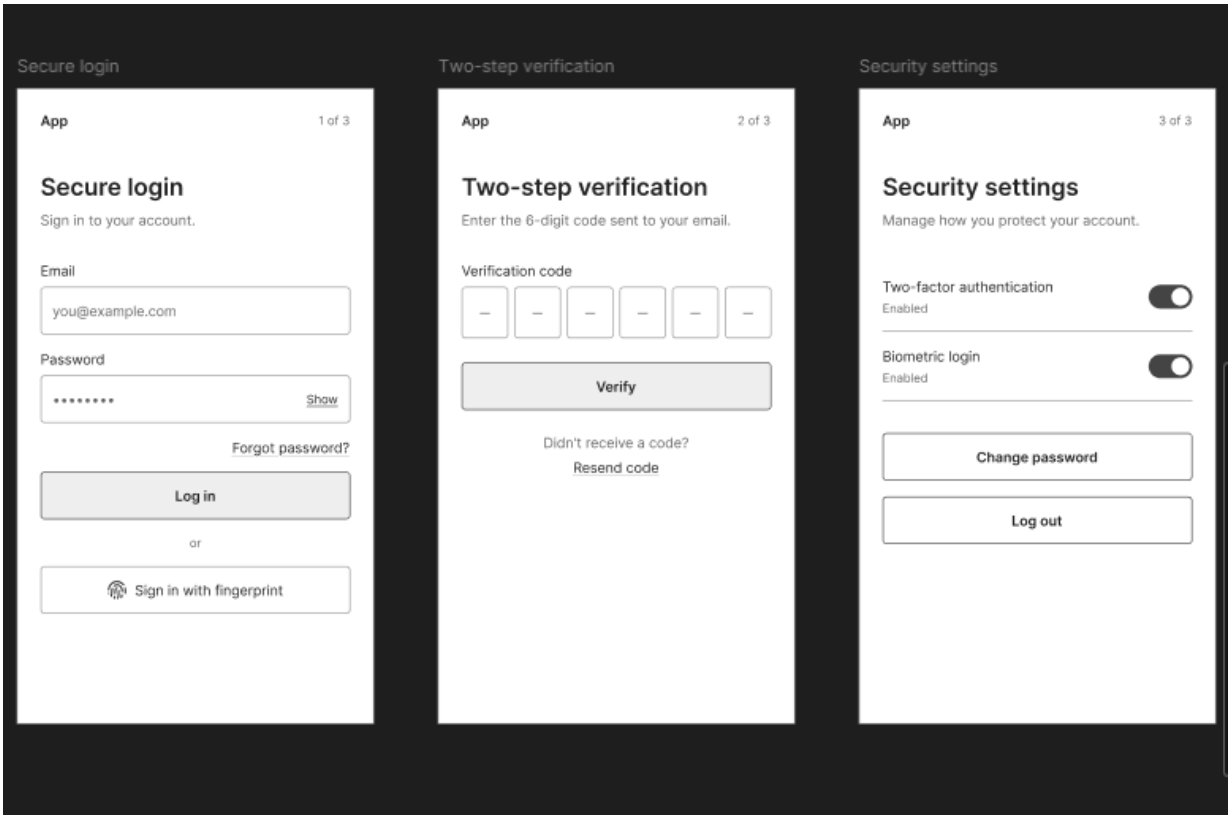

Procedure:

1. Open Figma and create a new design file.
2. Create a mobile frame for the application.
3. Design a login screen with username, password, and login button.
4. Create an OTP verification screen for secure login.
5. Design a home screen displaying user details and security status.
6. Add a security settings screen with password and privacy options.
7. Include fingerprint authentication and app lock options.
8. Add buttons for login, verification, and logout.
9. Use suitable colors, icons, and shapes to make the interface user-friendly.
10. Connect all screens using Prototype mode and preview the design.

Output:

Result: A mobile application wireframe incorporating security measures such as password protection, OTP verification, fingerprint authentication, and privacy settings was successfully designed using Figma.
