EXPERIMENT 7

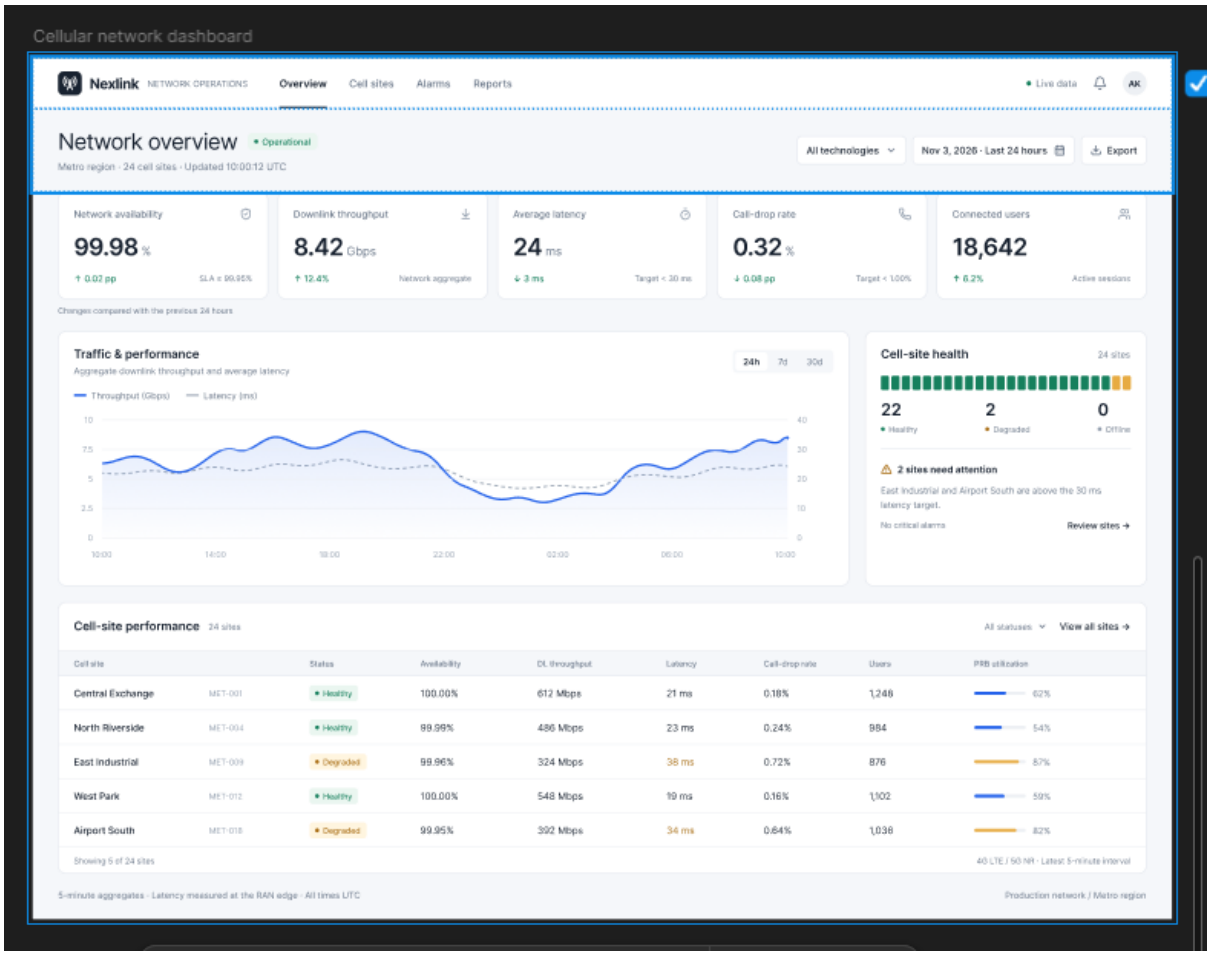

Aim:

To develop a dashboard prototype displaying the performance of a cellular system using Figma.

Procedure:

- Open Figma and create a dashboard frame.
- Add the title “Cellular System Performance Dashboard.”
- Create cards for signal strength, network speed, call success rate, and network coverage.
- Add simple charts and progress bars to display performance.
- Use different colors to highlight the performance values.
- Arrange all elements neatly.

OUTPUT :

RESULT:

A cellular system performance dashboard was designed successfully using Figma.
