Experiment 10: Multiple Access Techniques

Aim: To create a visual representation in Figma showing the differences between various multiple access techniques.

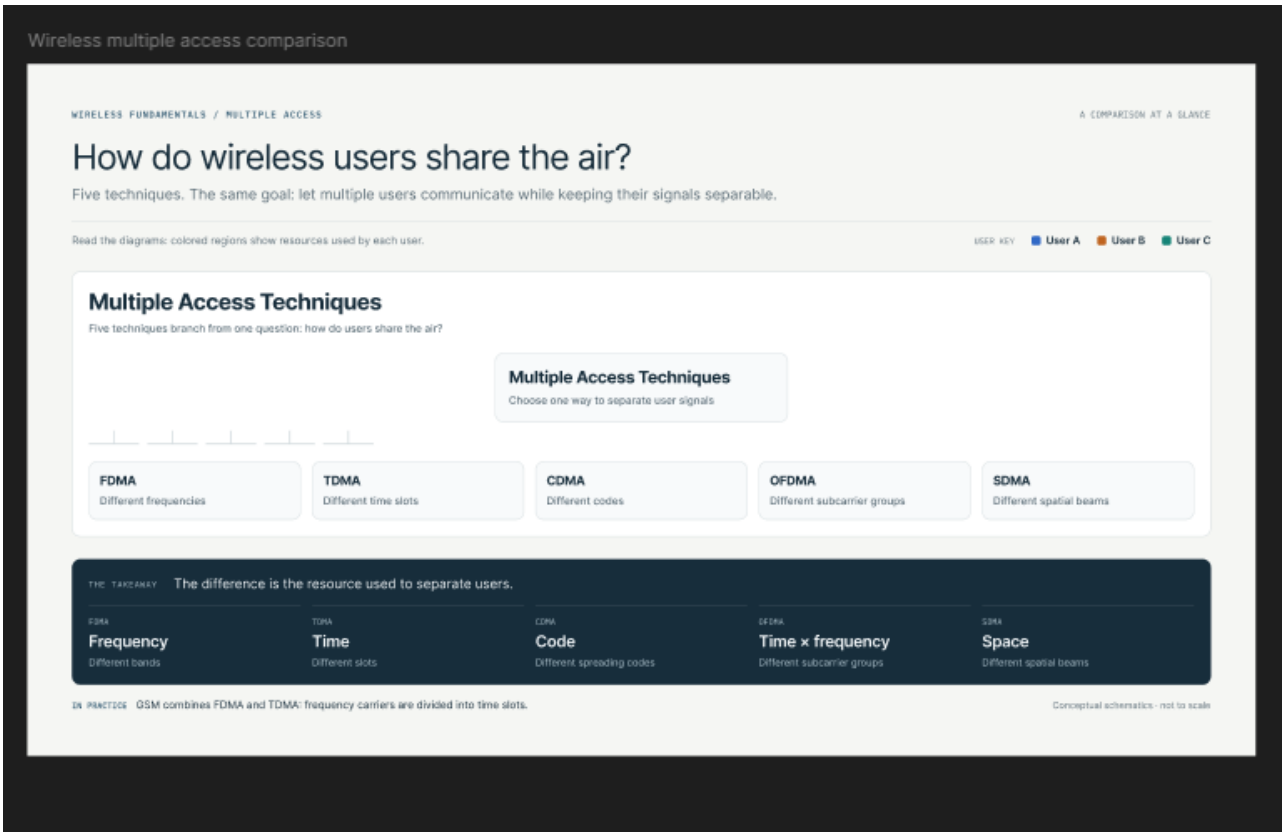

Procedure:

- Open Figma and create a new frame.
- Add the title “Multiple Access Techniques”.
- Create four separate cards for FDMA, TDMA, CDMA, and OFDMA.
- Draw simple diagrams using rectangles and lines to represent each technique.
- Add a short explanation below each diagram.
- Use different colors to distinguish the techniques.
- Add a conclusion at the bottom of the infographic.

Output:

Result: The visual representation of FDMA, TDMA, and CDMA was successfully created using Figma. The differences in frequency, time-slot, and code allocation were clearly illustrated.
